POSTGRADUATE DIPLOMA IN ICT

Capstone Project — Presentation & Demonstration Submission

Project Title	*[Enter full project title]*
Student Full Name	*[Enter full name]*
Student Number	*[Enter student number]*
Supervisor Name	*[Enter supervisor's full name and title]*
Stream Category	*[Select ONE: Application Development | Computer Networks | AI and Data Science | Web Technology | Information Systems]*
Academic Year	*[e.g. 2025 / 2026]*
Presentation Date	*[DD Month YYYY]*
Presentation Format	*[Live in-person | Live online | Pre-recorded video — select one and confirm with your supervisor]*

Declaration

I declare that this presentation and demonstration reflect my own original work and has been prepared in accordance with the academic integrity policies of the institution.

Student Signature	_____
Date	_____

1. Purpose of This Document

This document is submitted alongside your live (or recorded) presentation and demonstration session. It records what you plan to present, gives assessors a written record of your demonstration script and Q&A preparation, and is used together with the live session to award marks against the Presentation & Demonstration Rubric. Complete every section — sections map directly to the rubric used to assess this phase.

2. Presentation Delivery [25 Marks]

This section carries 25 marks: Structure, Clarity & Time Management (15) and Professionalism & Communication Skills (10). Your session must fit within the time allocated by your supervisor/programme coordinator.

2.1 Presentation Outline & Timing Plan

List each section of your presentation in the order you will deliver it, with a planned time allocation. Total time must match your allocated slot.

Order	Section / Talking Point	Planned Duration
1	*[e.g. Introduction & problem statement]*	*[mm:ss]*
2	*[e.g. Design & architecture recap]*	*[mm:ss]*
3	*[e.g. Live system demonstration]*	*[mm:ss]*
4	*[e.g. Results / evaluation highlights]*	*[mm:ss]*
5	*[e.g. Conclusion & next steps]*	*[mm:ss]*
—	*Total*	*[mm:ss — must*

		match allocated slot]

2.2 Communication & Delivery Notes

Briefly describe how you intend to keep the session clear and professional — e.g. use of plain-language explanations for non-technical concepts, planned pacing, how you will manage nerves or unexpected questions.

[Describe your delivery approach and how you will keep within time]

3. System Demonstration [40 Marks]

This section carries 40 marks: Live Demonstration of Core Functionality (25) and Handling of Technical Issues & System Robustness (15). The demonstration must show the system actually running — a slides-only walkthrough of planned functionality does not satisfy this section.

3.1 Demonstration Script

For each core functional requirement you will demonstrate, describe the exact steps you will perform live and the expected system response. This is your rehearsal script — assessors will follow along with it during the session.

Requirement / Feature	Steps to Demonstrate	Expected Result
[e.g. REQ-001: User login]	*[Step-by-step actions you will perform]*	*[What the system should show/do]*
[e.g. REQ-002]	*[Step-by-step actions]*	*[Expected result]*
[Add rows as required]		

3.2 Environment & Setup Requirements

State what is needed to run the demonstration (hardware, network access, test accounts, sample data) and confirm this has been tested in advance.

[Describe demonstration environment, dependencies, and pre-session testing completed]

3.3 Contingency Plan for Technical Issues

Describe your fallback plan if the live system fails during the demonstration (e.g. a backup recording, a secondary environment, offline screenshots) and how you will explain any issue that arises rather than concealing it.

[Describe your contingency/fallback plan and how you will handle unexpected failures]

4. Engagement & Understanding [20 Marks]

This section carries 20 marks: Response to Questions (12) and Audience/Panel Engagement (8).

4.1 Anticipated Questions & Prepared Responses

List at least five questions an assessor might reasonably ask about your design, implementation, or evaluation, and your prepared response to each. This demonstrates independent command of your own work.

Anticipated Question	Your Prepared Response
[e.g. Why did you choose this architecture over alternatives?]	*[Your answer]*
[Question 2]	*[Your answer]*
[Question 3]	*[Your answer]*

[Question 4]	*[Your answer]*
[Question 5]	*[Your answer]*

5. Supporting Materials [15 Marks]

This section carries 15 marks: Slide Deck / Visual Aid Quality (8) and Alignment Between Slides, Demo and Spoken Content (7).

5.1 Slide Deck Submission

Attach your final slide deck as a separate file alongside this document (PowerPoint or PDF). Confirm the slide count and that it complies with any format requirements set by your supervisor.

[Slide deck file name, total slide count, and confirmation of format compliance]

5.2 Alignment Check

Briefly explain how your slides, live demonstration, and spoken narrative will reinforce one another rather than repeat or contradict each other.

[Describe how slides, demo, and narrative are aligned]

6. Self-Reflection

This reflects Section E of the rubric (holistic — no independent marks, but informs overall mark quality): Confidence, Preparedness & Independent Ownership of Work; Overall Professionalism & Adherence to Time/Format Requirements.

[Briefly reflect on your own readiness for this session and any areas you are less confident presenting]

7. Self-Assessment Checklist — Rubric Alignment

Complete this checklist before your session. Each criterion maps directly to the Presentation & Demonstration Rubric.

Section Reference	Assessment Criterion	Max Marks	Self-Score
Section 2	Presentation Delivery	25	*[/ 25]*
Section 3	System Demonstration	40	*[/ 40]*
Section 4	Engagement & Understanding	20	*[/ 20]*
Section 5	Supporting Materials	15	*[/ 15]*
	TOTAL	**100**	*[/ 100]*

Criterion	Completed? (Yes / Partial / No)
A timing plan is included and totals the allocated slot length	*[Yes / Partial / No]*
The demonstration script covers every core functional requirement, with clear expected results	*[Yes / Partial / No]*
A tested demonstration environment and contingency plan are both described	*[Yes / Partial / No]*
At least five anticipated questions have prepared responses	*[Yes / Partial / No]*
A slide deck has been attached and its alignment with the demo/narrative is explained	*[Yes / Partial / No]*
Document has been proofread and uses formal academic language throughout	*[Yes / Partial / No]*
